

Update Stripe Version and Endpoints

Login to your Stripe Dashboard

Make sure you have the latest API version enabled

The screenshot shows the Stripe Developers dashboard. At the top, there are navigation links: Home, Payments, Balances, Customers, Products, and Reports. Below these, the 'Developers' section is active, with a sidebar containing 'Overview', 'API keys', 'Webhooks', 'Events', 'Logs', and 'Extensions'. The main content area displays 'API requests' with a table showing 0 successful and 0 failed requests. Below this is a 'Webhooks' section with a similar table showing 0 successful and 0 failed webhooks. At the bottom, the 'API version' is shown as '2020-08-27' with links for 'Default' and 'Latest'.

Go to DEVELOPERS >Webhooks

The screenshot shows the Stripe Webhook configuration page. The URL is `https://www.yourdomainname.com /stripesca_webhook.php`. The status is 'Enabled' and it is listening for '8 events'. The API version is '2020-08-27'. A red box highlights the 'Update details...' button in the top right corner. A blue text overlay with an arrow pointing to the button says 'OPENS a pop up to select all events'. A pop-up window is open, displaying a list of events: 'checkout.session.completed', 'payment_intent.amount_capturable_updated', 'payment_intent.canceled', 'payment_intent.created', 'payment_intent.payment_failed', 'payment_intent.processing', 'payment_intent.requires_action', and 'payment_intent.succeeded'. The main content area shows a log entry for 'payment_intent.canceled' at 5:59:51 PM, with a response status of '200 OK'.

Click Update Details and a edit the Pop UP
Select all 8 “Events” and Update Endpoints

Edit webhook endpoint

Endpoint URL

https://www.yourdomainname.com/stripesca_webhook.php

Description

An optional description of what this webhook endpoint is used for.

Events to send
